

## **SL 203 - Deaf Culture and ASL Conversational**

2 Credit Hours

ASL Labs are professional development and cultural-linguistic practicums. These practicums provide students with an experiential learning environment that aims to 1) better one another and foster a positive learning environment; 2) build a professional network within the deaf community locally and globally; and, 3) use the cohorts' collective skills to become a resource of practice and promote the field of Deaf Studies.
