CS 105 - Introduction to Computer Science

3 Credit Hours

This course will introduce you to the field of computer science and the fundamentals of computer programming. CS105 is specifically designed for students with no prior programming experience, and touches upon a variety of fundamental topics. Topics include data storage and manipulations, operating systems, networking, algorithms, programming languages, database systems, software engineering, computer graphics and artificial intelligence. By the end of the course, you will understand the basics of computer science. The principles you learn here will be developed further as you progress through the computer science discipline.
