CS 350 - User Interface Design

3 Credit Hours
This course will provide students with the knowledge of responsive web page creation using Hypertext Markup Language (HTML) and Cascading Style Sheets (CSS). Students will learn how to create hyperlinks, headings, lists, tables, formatting, and images. Upon successful course completion, students will be able to create a basic responsive web site. This course also examines human-computer interaction in the context of graphical user interfaces, covers human capabilities, design principles, prototyping techniques, evaluation techniques, and the implementation of graphical user interfaces.
