Computer Science

Bachelor of Science

Description

The Bachelor of Science (BS) in Computer Science is a robust program that covers the fundamentals of computing technology, adapting to the constantly evolving tech landscape. Courses span various programming languages, platforms, and operating systems, blending hands-on and theoretical study. With a flexible curriculum and diverse electives, students can customize their education to focus on specific interests, such as Cybersecurity, Data Science, Esports, Networking, or Software Systems. Throughout the program, students develop skills to analyze complex problems, design and evaluate solutions, communicate effectively, make ethical decisions, and lead teams. This program prepares students for diverse career opportunities in high-demand, high-paying roles like programmer, systems analyst, app developer, and more.
