

EL 495 - Project II

3 Credit Hours

By completing this capstone project, students have an opportunity to apply all the knowledge and skills they gained throughout the program to real-world problems. Unlike the rest of the courses offered previously, much less guidance from faculty members will be given and students are expected to play a leading role in completing their projects. This project can be used to demonstrate students' skills to potential employers as a strong indicator of their expertise in the field of Computer and Electrical Engineering.
