

Computer Science

Master of Science

Description

The Master of Science (MS) in Computer Science program is designed to deepen expertise in cutting-edge areas like cybersecurity, computer systems, and software methodology. Tailored for those aiming to excel in high-growth tech fields, this program emphasizes practical and theoretical knowledge. Students develop sophisticated software projects, gain in-depth understanding of modern computer systems, and master advanced algorithms and methods. A 6-credit project or thesis caps off your learning, showcasing your ability to tackle real-world challenges. Prepare to be at the forefront of technological innovation and advancement.
