

Innovation

Master of Science

Description

The Master of Science (MS) in Innovation program develops advanced capabilities in innovation processes across a diverse array of contexts, including business, government, education, social movements, science, health, and technology. Students in this program may choose to focus on areas such as intellectual property, business transformation, innovation processes, machine learning, and artificial intelligence. Students will learn skills specific to leading innovative teams, and how to manage the delicate balance of hierarchical and distributive leadership structures to yield innovative outcomes.
